

Flat Panel Ring Lights

DATA SHEET

Product Description

Luna Sciences' Flat Panel LED Ring Pendant Series is a technological breakthrough in the LED lighting. A clear acrylic is laser dotted to capture the light and redirect it at 90 degrees to create up down illumination. When the fixture is off, you can see through the glass. When the fixture is turned on, the glass illuminates gracefully thereby creating a beautiful effect in the space. Standard sizes are 24", 30" and 40" in diameter. Single sided flat panel can be hung using a metal stem into a small canopy. Double sided flat panels use 4 cables to hang of which one of them is the power cable. It is a true architectural statement.

Product Specifications

POWER CONSUMPTION	40W for 24"D <> 75W for 40"D
TOTAL FLUX [LM]	3,600lm, 6,760 [total lumens are split up and down
EFFICACY	90+ lm
COLOR TEMPERATURES	4000, 5000
INPUT VOLTAGE [AC]	100 - 277 VAC [50/60Hz]
CRI [Ra]	80+
DIMENSIONS	24"D, 40"D
FRAME DESIGN	Suspended via 4 cables, or Canopy option
FRAME COLOR	White, Black, Aluminum Silver
PROTECTION RATING	Indoor use only / Wet location
DIMMING TYPE	0-10 Dimming, [option for other dimming type]
